

## KNOW YOUR ARCHITECT

# Sundeeep S Karkhanis

**I was born on:** 20<sup>th</sup> January, 1975.

**My favourite structure (designed by someone else):** 'Barcelona Pavilion' by Ludwig Mies Van Der Rohe.

**I am inspired by:** Contemporary architecture and natural materials.

**Architecture to me is:** A medium of creative expression that gives form to people's dreams.

**I wish I had designed (and how would that have been different from now):** The new breed of residential townships on the outskirts of Mumbai and Pune, which are insensitive to local context and topography. I would adopt a site responsive and climate sensitive approach, along with the use of natural materials.

**My worst design:** None as yet.

**My best design:** I give my creative best to every design, and grow and learn with each new project. My best design is yet to come.

**My signature design element (one element without which no design of yours seems complete):** Play of surfaces in multiple levels as an accent element.

**To unwind I:** Go on nature trails and walk on the Carter Road promenade in Mumbai.

**If I was not an architect:** I can't imagine not being one.

**Society Interiors to me is:** A very progressive design magazine giving the reader an insight into the creative world of architecture and interior design. It is a platform to showcase talent.
